

**REMARKS**

Claims 64-77 are pending. In the Notice Of Non-Compliant Amendment mailed October 4, 2005, the Examiner stated, "The submission [July 8, 2005 Response] is not fully responsive to the prior Office Action because all the claims encompassing the elected invention have been cancelled and claims to non-elected inventions have been added."

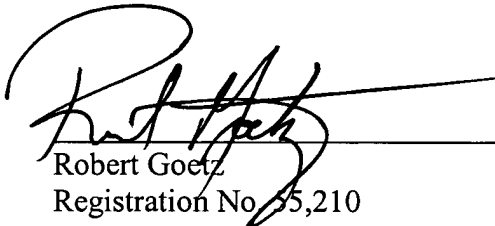

The Applicants now cancel Claims 64-77. The Applicants reserve the right to prosecute the original Claims 64-77 or similar claims in the future. The Applicants now add new Claims 78-80. Claim 78 is a combination of previously canceled Claims 32 and 41. Claim 79 is a combination of previously canceled Claims 54 and 63. The Examiner admitted that "Claims 41 and 63 are free of the art of record because the art fails to teach the specific vector deposited as DSM11633." Office Action dated April 6, 2005, page 13. Claim 80 describes the specific vector deposited as DSM11633, which the Examiner admits is free from prior art.

**CONCLUSION**

It is respectfully submitted that the invention as claimed fully meets all requirements and that the claims are worthy of allowance. Should the Examiner believe that a telephone interview would aid in the prosecution of this application, Applicant encourages the Examiner to call the undersigned collect at (608) 218-6900.
